MAKE YOUR BUDGET GO FURTHER!

QUALITY RECONDITIONED MACHINERY FROM GREENSWARD!

- All machinery is guaranteed
- Finance can be arranged
- Export and shipping
- 45 years experience of turfcare machinery

SIMPLE, HONEST, ON TIME, QUALITY SERVICE - our commitment to you.

Greensward is a long established business in Leeds, United Kingdom, that has been supplying high quality Ex Demonstration, reconditioned and used Golf Course and Groundcare machinery from top brand suppliers to many satisfied clients worldwide since 1969.

For UK Clients we can offer attractive payment plans and finance deals and we would be very happy to arrange for a proposal to be sent to you. Payment can also be made by most Credit/Debit cards, Cheque or bank Transfer. Transport can be readily and promptly arranged.

For Export enquiries, we offer a full service including packing, shipping, documentation and everything needed to make it easy for you to receive your machinery. Please note, for some Export orders there will be a small surcharge applied, please check with us when ordering.

Our Warranty Details are shown as below.

Example:	£9750	£7950
	Full Warranty	**30 Day Warranty**

MACHINES SOLD WITH "FULL WARRANTY"
These are either Brand New machines which carry the manufacturers warranty for the period specified by the manufacturer, or are Ex-demonstration, Ex display or Reconditioned machines which have been carefully examined and defective parts replaced. These are sold with 12 months warranty on all parts, (3 months on Forestry, Trenching, and certain other specified machines) which gives ample time for any defect to become apparent. In such case you should immediately report the defect to us. We will then send you a replacement part free of charge and only ask you pay for fitting. We may instead at our discretion ask you to return a part to us for repair. This guarantee only applies where machines are used for the purpose for which they were designed, and does not cover repairs needed due to fair wear and tear, impact damage, lack of owner maintenance, wearing parts or rubber components such as belts and tyres etc.

MACHINES SOLD WITH "30 DAYS PARTS WARRANTY"
These have been checked over and are in good working order but are not fully reconditioned. They carry 30 days parts warranty on all major mechanical parts including engine, gearbox/transmission, hydrostat, hydraulic pumps and motors but excluding other more minor items.

MACHINE SOLD "AS IS"
These are machines which are either un-reconditioned, or are for sale directly from one of our customers. These do not carry any warranty whatsoever. Neither do machines which are used for hire purposes.

All machinery is offered subject to its remaining unsold at time of order. All prices are ex works and subject to VAT where applicable. Prices of machines not yet reconditioned at time of going to press are estimated and may be subject to variation before sale.

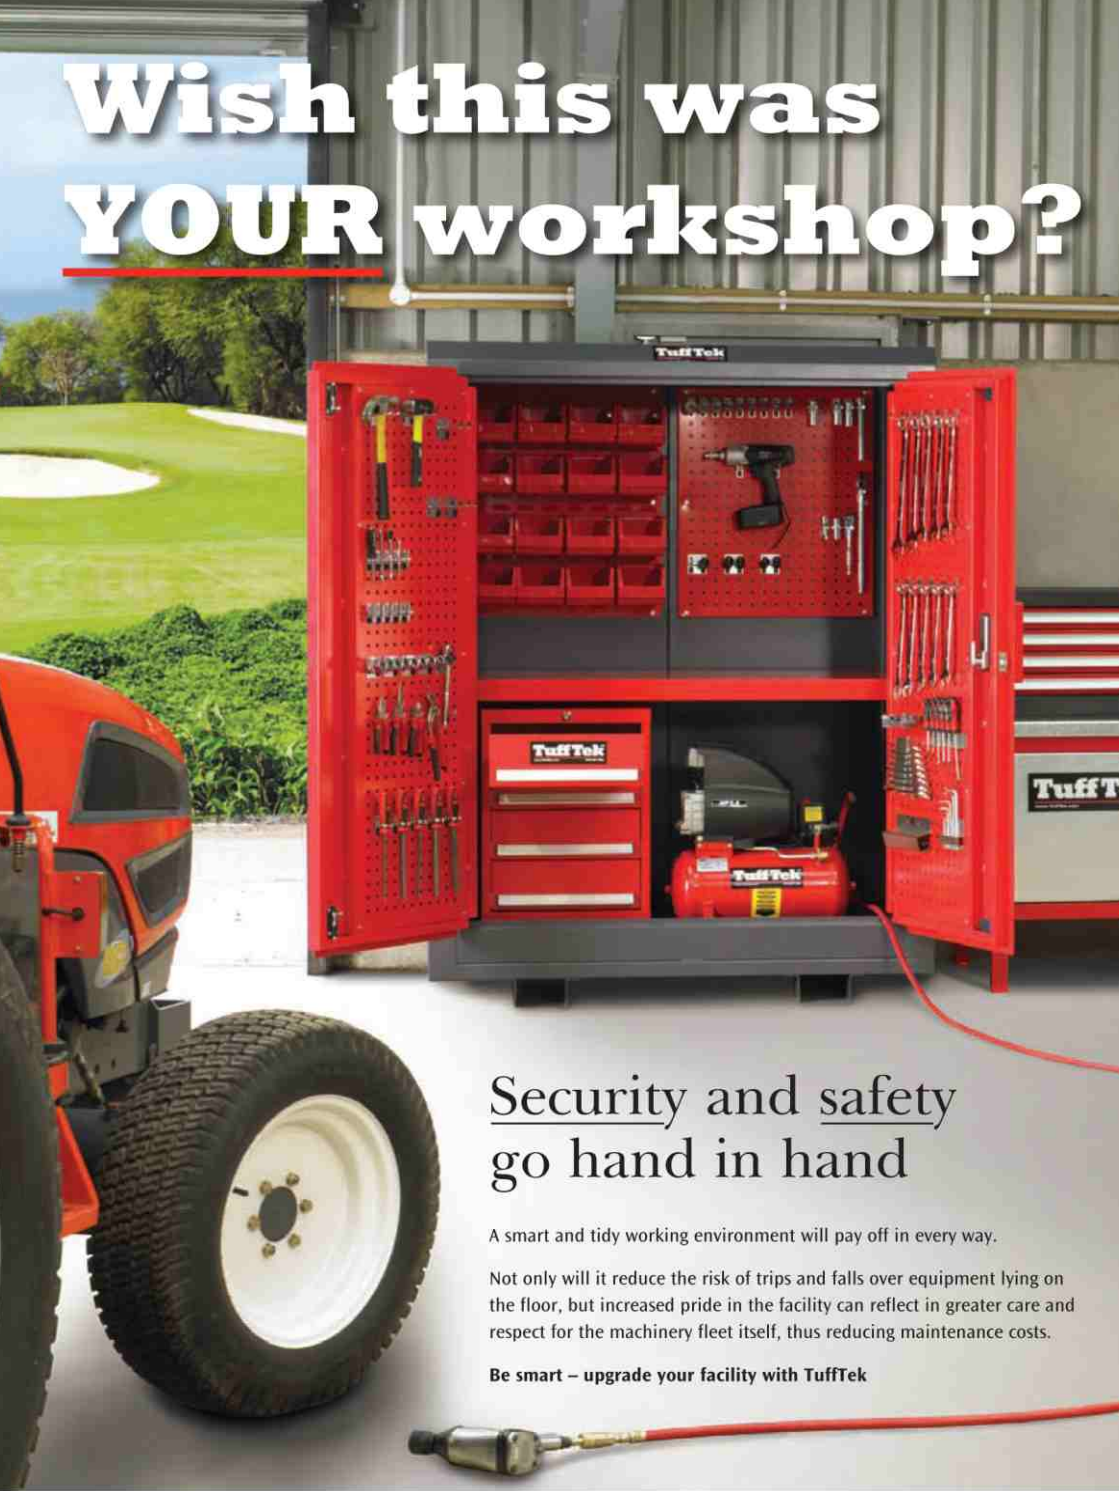
Wish this was YOUR workshop?



Security and safety go hand in hand

A smart and tidy working environment will pay off in every way.

Not only will it reduce the risk of trips and falls over equipment lying on the floor, but increased pride in the facility can reflect in greater care and respect for the machinery fleet itself, thus reducing maintenance costs.

Be smart – upgrade your facility with TuffTek

TuffTek™
Smart Security

Tuff-System Cabinets

Total security!

Tuff-System cabinets take the concept of security to a totally new level. They have heavy duty carcases and reinforced doors with continuous hinges and anti-jemmy rebates plus a highly advanced multi-point locking system. The unique ASL Automatic Self Locking system ensures that the doors are kept locked 100% of the time throughout the day, and double deadlocks provide extra security over night.

For situations where there is a high staffturnover, only senior staff need to have keys for locking the deadlocks. During the day, access is by an automatic digital slam-lock, which can be simply re-programmed to a different combination any time you have staff changes.

SECURITY ALERT

Strimmers, Chainsaws and Hand Tools are the most commonly-stolen items from golf courses.

TOP SECURITY

SHEER STRENGTH!

Heavy duty cabinet carcase for maximum security.

Continuous hinges totally seal the door gap.

Reinforced bracing inside doors for extra security.

Anti-jemmy overlaps and rebates all round prevent doors being forced.

SEVEN-POINT LOCKING

Two high security 5 lever dead locks with anti-cut rollers.

NEW

Automatic slam-lock with triple point locking instantly locks both doors the moment they are shut. Foolproof security!

Tuff Tek ASL
Patent Pending
AUTOMATIC SELF-LOCKING SYSTEM

Two shoot bolts on the left hand door. A total of seven locking points for utmost security.

Tuff-System

Configured however you want them...

This configuration allows the storage of two hover mowers and three strimmers plus other equipment such as blowers.

A full width strimmer rack holds up to five strimmers, with plenty of room for chainsaws and blowers below.

A central divider, with multiple shelves on either side provides a totally versatile configuration for storing everything from machinery to protective clothing.

Strimmer Vault

Secure your strimmers!

Strimmers are a particularly popular target for thieves because they are so easy to carry away and there is a ready resale market for them. Add to this the fact that they are often left unsecured, laid on the floor or in a corner, and it's easy to see why they are such a vulnerable target.

The TuffTek Strimmer Vault with its high security deadlocks will firmly secure up to five strimmers. At the same time it also prevents them being a trip hazard on the floor, and keeps your facility looking smart and tidy. A great feature in any greenkeeper's store.

BACK TO BACK SECURITY

The Strimmer Vault can either be secured to a wall, or else be bolted to the Hover Vault (see page 8) and fixed to the floor.

SECURITY ALERT

Strimmers are taken in 63% of golf course equipment thefts. Beat the thieves by keeping yours safely secured in a TuffTek Strimmer Vault.

Dimensions: W2050mm x D360mm x H2080mm

HIGH SECURITY LOCKS

High security 5 lever deadlocks with triple anti-cut rollers come as standard on the Strimmer Vault.

EASY TO USE

The Strimmer Vault is equipped with hanging hooks with a choice of spacings to suit all popular strimmers.

BUNDED DRIP TRAY

This ensures that if your strimmers leak any fuel/oil it will be contained and not pollute your drains.

GAS STRUTS

Twin gas struts make it easy for you to lift the heavy- duty vault lid.

Solid protection!

Mower Vault

With Pedestrian greens mowers now costing anywhere from £3,000 to £7,000 it is not surprising that they are increasingly being targeted by thieves. It therefore pays to protect them! The TuffTek Mower Vaults securely encase your mowers, out of the reach of thieves or vandals.

SECURITY ALERT
Many thefts from golf clubs happen during the daytime when security is low. Park your mowers inside a TuffTek Mower Vault at all times when not in use.

Mower Vaults can be bolted down to the floor for extra security, and may be joined together in a row for golf clubs with multiple greens mowers to protect.

NEW

Dimensions:
MV1 - W1100mm x D800mm x H870mm
MV2 - W750mm x D1050mm x H775mm

HIGH SECURITY HOOK-LOCK

Two high security hook-locks are used which actually hook into the sides of the loading ramp to prevent it being forced.

TWO SIZES

The Mower Vault comes in two sizes; the MV1 for cylinder mowers, and the MV2 for rotary mowers.

SAFE AND SECURE

With the loading ramp locked shut, you can be restful in the knowledge that your mower is firmly secured.

Hover Vault

Protect your hover mowers!

Hover mowers and other power equipment such as chainsaws, hedgecutters and blowers are all regularly targeted by thieves. The TuffTek Hover Vault has been specifically designed to combat this menace and should be a top priority for all golf and ground maintenance facilities.

Dimensions: W2210mm x D750mm x H840mm

HIGH SECURITY DEADLOCKS

High security 5 lever deadlocks with triple anti-cut rollers come as standard on the Hover Vault.

HEAVY DUTY

Heavy duty manufacturing is used throughout, with a full width continuous hinge, anti-jemmy plates and reinforced and gusseted construction.

BUNDED SUMP

The Hover Vault has a bunded sump, enabling you to securely store all types of power equipment, and guard against fuel/oil leaks at the same time.

PICK-UP VAULT

SECURE YET ACCESSIBLE STORAGE FOR PICK-UP TRUCKS

NEW

Protecting your outdoor power equipment from opportunist thieves while you are out working has always been a nightmare. No longer. The unique TuffTek Pick-up Vault has been specially designed to provide the highest degree of security for strimmers and power tools, whilst giving you quick and easy access.

Available in 1.8m (6') and 1.2m (4') widths to suit a wide range of pick-ups and turf trucks.

"Small power-tools are more often stolen during the working day. Utilise a secure store on trucks or put away when unattended, e.g. teabreaks, etc."

Golf Greenkeeper, Middlesex

TOTAL VERSATILITY

The Pick-up Vault can be configured to take one strimmer or two, according to your specific requirements.

Dimensions: W1890mm x D640mm x H670mm
W1200mm x D480mm x H460mm

SLOT FILLERS

The slip-in Slot Fillers protect the contents of your Vault from the weather, and also from thieving fingers!

DIVIDER SYSTEM

The unique removable dividers enable you to keep your jerry can, chainsaws and strimmers, etc separated for safe transit.

SIDE LOCKING

Locks positioned at the ends of the Vault give easy access without having to climb onto your pickup.
